2021 Starter Plant Order Form

The growing of a home garden is as important today as it has ever been. Many of us find the garden a place of nourishment, work, and beauty. We are entering our 5th year committed to offering you healthy starter plants for your garden. Our seeds continue to be organic and non-GMO verified, planted in organic starting mix. We have experienced some challenges in preparing for this year's growing season; shortage of seeds, higher prices and certain varieties are sold out. We have needed to make a few changes to our order form as a result, but are confident that the additional varieties will produce well. The varieties that we offer are selections that we are pleased with in our own garden. We encourage you to place your plant order early as early pricing is good through March. We look forward to getting your garden off to a healthy start. Thank you for your support of our farm and for GROWING A HEALTHY FUTURE!

Matt & Anita McNamara

Please contact us if you or someone you know needs additional produce throughout the summer and fall.
